EDUCATION

Montclair State University

Bachelor of Science - Computer Science

Expected Graduation: May 2028

Relevant Coursework: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Computer Networks

Clubs & Organizations: Robotics Club, Computing Club, DECA, Finance Society, MSU Marketing Club

EXPERIENCE

Montclair State University | Student IT Support Specialist | Montclair, New Jersey

Apr 2026 - PRESENT

- Resolve technical support tickets across phone, email, chat, and in-person channels in ServiceNow, troubleshooting identity account access, MFA authentication, Canvas, and wired/wireless connectivity issues for students and faculty
- Conduct remote support sessions using Bomgar, follow escalation procedures, and route complex cases to specialized IT teams while documenting incidents clearly and providing technical guidance to users with varying expertise levels

The Citco Group Limited | Software Developer & Data Analyst Intern | Jersey City, New Jersey

Feb 2026 - Jun 2026

- Developed and deployed AWS Cloud-based data pipelines and analytics solutions to process financial data for alternative asset management clients, improving data processing efficiency by 20% and reducing manual reporting time
- Integrated AI-powered automation tools using Python and AWS services (Lambda, S3, Glue) to streamline fund administration workflows, enhancing operational accuracy and enabling real-time data insights for stakeholders

Reality AI Lab | Software Developer & Generative AI Engineer | New York

Feb 2025 - Jan 2026

- Built an AI-powered teaching assistant leveraging Marvel AI's platform with ReactJS and Next.js to automate responses for 5,000+ student queries, reducing instructor response time by 40% through intelligent query classification
- Designed generative AI solutions using LangChain, LlamaIndex, and RAG workflows, integrating knowledge graphs and OpenAI embeddings with Redis Vector Search for enhanced semantic search and content retrieval

Zoetis | Summer Intern | Parsippany, New Jersey

Jul 2024 - Aug 2024

- Analyzed enterprise use cases of APIs and Generative AI at Zoetis, focusing on system integration, data flow, and automation across business operations, identifying how these technologies streamline pharmaceutical workflows
- Conducted research on cybersecurity principles, data analytics pipelines, and API architectures, evaluating real-world vulnerabilities and mitigation strategies focusing on how each area applies to enterprise-level business operations
- Developed and delivered a technical presentation covering cybersecurity frameworks, API design patterns, and data analytics workflows, including real-world breach case studies and industry best practices

PROJECTS

TideTrack | Chrome Extension for Study Productivity Tracking | Co-Founder

Feb 2026 - PRESENT

- Built a Chrome extension that passively tracks study sessions through tab monitoring, achieving 95%+ accuracy in distinguishing focused study time from distractions using whitelist detection and intelligent idle recognition
- Engineered AI Study Coach agent (Kai) using LLM workflows to analyze user behavior patterns and deliver personalized focus recommendations; implemented webcam presence detection with Python, Flask, and OpenCV for automatic session pausing and intelligent session management

Neuro-Sound Lab | Neuroscience-Inspired Audio Synthesis Platform | Demo - [Video](#)

Feb 2026 - Sep 2026

- Developed experimental web application generating personalized soundscapes based on cognitive and emotional state using Web Audio API, synthesizing layered audio with adaptive frequency ranges, tempo, and spatial depth informed by neuroscience principles to optimize user cognitive performance
- Engineered state analysis engine converting cognitive assessments into weighted scores; created explainable UI with science-forward explanations describing how audio characteristics influence cognition and perception

PUBLICATIONS

The Amazing World of Python: Youth Coders Edition | [Book](#)

Feb 2025

- Authored an educational Python programming book covering fundamentals through AI applications, breaking down complex topics like data structures, OOP, and web development into engaging, age-appropriate content
- Structured 45 pages spanning beginner to advanced concepts, including cybersecurity, machine learning, mobile app development, and version control with Git to prepare readers for real-world programming challenges

LEADERSHIP

Akshaya Patra Foundation | Youth Ambassador | Edison, New Jersey

Feb 2023 - PRESENT

- Led fundraising initiatives and organized community events with 10% higher participation, significantly increasing donations and visibility through social media campaigns, donor outreach programs, and volunteer coordination efforts
- Represented Akshaya Patra at community events, building donor and volunteer relationships while promoting the foundation's mission to combat childhood hunger across New Jersey communities

SKILLS

Technical Skills: Python, Java, JavaScript, C++, SQL, HTML/CSS, React.js, Next.js, Node.js, OpenCV, LangChain, LlamaIndex, OpenAI API, AWS (Lambda, S3, Glue), PostgreSQL, Redis, Git | Generative AI, RAG, Data Analytics
